

Dear Interested Parties:

Pozin Enterprises, Inc. dba Sun-Glo Plating Company has one of the largest and most comprehensive metal finishing facilities in the state of Florida.

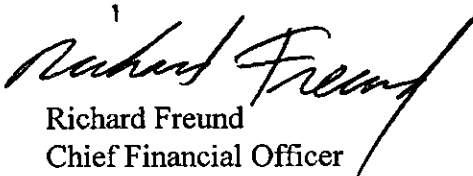

Our company layout is such that we have many electric meters, and when I realized the billing was inconsistent by meter, I was sure that we were being over charged somewhere, but uncertain as how to approach the provider confidently.

When I contacted Util Auditors to explain the dilemma they were sure that they could assist and requested a copy of our invoices.

Following some investigation and a few questions about the layout of our operation, they confirmed implementation of tariff adjustments resulting in a significant savings, and also that we were to receive a refund, as well.

We are appreciative of the services that Util provided to our business, and in fact, are looking to expand the scope of work in the months to come. I would highly recommend the services of their firm.

Regards,

Richard Freund
Chief Financial Officer
