To Whom It May Concern;

Menorah Manor is a not-for-profit senior healthcare organization that has been serving the St. Petersburg, Florida community with integrity since 1985. As the CEO at Menorah my priority lies in assuring the best care for our residents and assuring that their needs are met.

Part of being able to do so effectively includes watching our operational expense costs to be sure that we have the funds to support the programs that benefit our seniors and improve their quality of life.

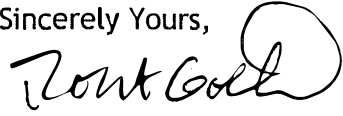

When we were originally approached by Util Auditors about reviewing the details of our utility and contract billing, I was skeptical of what they could find. There was no upfront cost so I figured, "Why not?"

Within weeks their firm produced a 5-figure refund on our energy billing as well as an ongoing monthly savings. I was pleasantly surprised. A few months later they repeated the effort with a 5-figure combined refund and savings on our workers' compensation policy premium as well.

Util Auditors has consulted on other potential areas of opportunity for cost savings and we continue to work with them on identifying where additional savings and refunds may exist.

In healthcare - and specifically not-for-profit organizations - every penny counts. There are always better things for us to invest our money in and their service provides a no-risk means of finding savings for your business and residents.

I would highly recommend the services of Util Auditors, LLC to anyone in healthcare.

Sincerely Yours,

Robert Goldstein
